

Know the Speed Limit

The importance of the warehouse safety initiatives and numbers are all tied to the Safety 8 Campaign, which we will discuss more in depth in this issue of Inside Choice Aviation.

From the time you step into the warehouse until you clock out at the end of the shift, your number one job is to be safe. We are not only trying to ensure your safety and your coworkers' safety, but make sure that you stay healthy. We are also trying to make sure that operations run smoothly and improve customer satisfaction with our operations.

In this bulletin we will be discussing speed limit:

- Know the speed limit in the warehouse and on the ramp and follow those numbers.**
- Know where the blind spots are in the warehouse, especially around blind corners.**

In the end, going home to your families healthy each day is the most important thing. Warehouse safety helps improve morale and usually reduces potential injuries. Here at CHOICE Aviation, we are committed to your well-being and making sure that you know you are working in a safe and secure warehouse.

Safety is a CHOICE, and we choose you!
