

Safeguarding Our Success

A Message of Appreciation and Commitment to Safety

In this issue of **Inside Choice Aviation**, I want to say **thank you**.

Whether you're working on the ramp, in our warehouses and cargo facilities, providing customer service, or supporting operations behind the scenes, your dedication, professionalism, and teamwork are the driving force behind everything we accomplish. Ground handling is demanding work that requires precision, communication, and constant situational awareness. Every aircraft serviced, every piece of cargo handled, and every customer assisted reflects your commitment to excellence.

Thank you for the hard work, resilience, and pride you bring to every shift. You are the foundation of CHOICE Aviation Services, and your commitment is what keeps our operation safe, our customers confident, and our team moving forward together every day.

Safety Is the Foundation of Everything We Do

Operational efficiency keeps us moving—but **safety ensures every employee returns home safely to their family at the end of each shift.**

In aviation ground handling, no task is so urgent that it cannot be performed safely. A strong safety culture is built through teamwork, accountability, open communication, and looking out for one another every day.

This Month's Safety Focus

Pace Over Speed

Busy schedules and tight aircraft turn times can create pressure to rush. Take the time to perform each task correctly the first time.

- Inspect all **Ground Support Equipment (GSE)** before each use.
- Verify clearances and maintain safe distances when operating equipment.

Speak Up for Safety

Safety is everyone's responsibility, regardless of position or seniority. If you observe:

- Unsafe conditions
- Damaged or malfunctioning equipment
- Improper procedures
- Potential hazards

Report them immediately. Speaking up before an incident occurs protects our coworkers, our customers, our aircraft, and our operation.

Follow Standard Operating Procedures (SOPs)

Our Standard Operating Procedures exist because they protect people and ensure consistency across every operation. **Always remember to:**

- Wear all required Personal Protective Equipment (PPE).
- Follow posted ramp driving speed limits.
- Maintain constant situational awareness around aircraft, vehicles, and GSE.
- Use proper lifting techniques and ask for assistance with heavy or awkward loads.
- Never bypass or shortcut safety procedures to save time.

Following SOPs every day is one of the most effective ways to prevent injuries and maintain a safe working environment.

Safety Starts With You

- Every pre-shift inspection...
- Every equipment check...
- Every hazard reported...
- Every teammate you assist...

...helps strengthen the safety culture at CHOICE Aviation Services.

Stay Alert
